Campsite regulations for daily campers

2024

We welcome you to our campsite and wish you a pleasant stay. For the benefit of all our guests, we ask you to adhere to our campsite regulations.

Section 1

Parking spaces

1. You are not entitled to a specific parking space. The owner is authorised to assign daily campers a different pitch for good cause. Important reasons are, in particular, necessary maintenance or refurbishment work, weather-related reasons or the redesign of the campsite.
2. Daily campers may only park one caravan or motorhome with an awning, one car and one motorcycle on a caravan pitch without a permanent hookup. After prior consultation with campsite reception staff, it is also possible to pitch a small igloo tent.
3. If requested to do so by Campsite Bostalsee, you must provide a valid gas test certificate for your own caravan or motorhome.
4. Electricity is available from the designated power points. Electricity consumption is included in the final price for caravan pitches; for tent pitches, electricity is charged at a flat rate per night on request. Only use suitable power cables; the campsite wardens will be happy to answer any questions you may have. The operator shall accept no liability in the event of power outages.
5. To avoid problems when setting up caravans etc., it is essential to follow our instructions. Care must also be taken to ensure nobody is at risk of harming themselves on tent pegs, tent cords, power cables and other accessories. The use of electric or gas-fuelled heaters in tents is strictly prohibited for fire safety reasons. The location of the tent or caravan, including the vehicle or towing vehicle, is determined by us. An unauthorised change of pitch is not permitted.
6. Daily campers are obliged to maintain rented pitches in accordance with the campsite regulations; they are also responsible for ensuring safety at all times. The pitch or tent pitch must be left clean and tidy on departure. If daily campers fail to meet this obligation, the owner is entitled to clear up the pitch at the expense of the campers.
7. The owner or authorised members of staff have the right to inspect the pitch and the tent/vehicle on it after registration.

Section 2

Entry and exit

1. Entry and exit to the campsite for campers is controlled by an automatic barrier system. This demands the use of a barrier transponder, which requires a deposit. This deposit will be refunded upon departure and return of the transponder, provided that no other claims exist.
2. Tent campers may drive vehicles onto the campsite for loading and unloading. Designated car parks are available for parking.
3. Driving vehicles of any kind is only permitted on the designated paths at walking pace (10 km/h). The German road traffic regulations apply. Particular consideration must be given to children.

Section 3

Pets

Dogs are generally permitted, but consent may be revoked in individual cases. Any dog waste on the campsite must be cleared up immediately by the dog owner. A maximum of two dogs per pitch are allowed. The dog fees can be found in the valid price list. Dogs must be kept on a lead at all times.

Section 4

Quietness

1. The night-time quiet period is from 10 pm to 6 am. During this period, the campsite must not be entered by any cars, vans or motorcycles. Our company vehicles are exempt from this rule. For the benefit of all our guests, we ask you to keep quiet, especially during this period. Anyone who violates the regulations on quietness at their pitch must expect to be removed from the pitch immediately. In this case, the paid fees are non-refundable.
2. There is a "zero bass tolerance" throughout the campsite. This means that all music systems (car speakers, music boxes, etc.) are strictly prohibited at all times of the day. Music may only be played on a non-amplified smartphone, as loud music is not permitted at the campsite.

Section 5

Common areas, waste, open fires

1. Common areas and amenity buildings must be left in a clean and tidy condition. Children under 8 years old must be accompanied by an adult at all times in the amenity buildings. Dogs are not allowed in these areas.

Smoking is prohibited in these areas.

2. Waste should only be placed in the bins provided at the recycling centre. Care must be taken to ensure that the applicable waste regulations and, in particular the waste separation rules, are observed in the interest of environmental protection. The relevant instructions can be found in the "Sorting Guide", which is available at the reception. Offenders will be prosecuted.
3. It is not permitted to discharge waste water into the campsite's waste water drainage system or to connect your own water pipe.
4. Open fires are only permitted in the designated barbecue areas or in fireproof containers. Open fires of any kind are strictly prohibited during and after prolonged dry spells.

Section 6

Tourism tax

The owner draws attention to their obligation to levy the tourism tax of the municipality of Nohfelden from daily campers in accordance with the applicable statutes. The tourism tax must be paid on the day of arrival.
